Net income(loss)	139,170	27,019	-14,049	-36,815	

ii) Domestic sales volume (at capacity of 40 million tons): 15,440 Thousand tons (including solidification materials)

2. Current situation and review of the Taiheiyo 10 Medium-Term Management Plan

1) Comparisons between the 10 Med-Term Plan's numerical targets and forecasted results for Fiscal 2010

(100 millions of ye						
	Consolidated		Non-consolidated			
	10 Med-Term Plan	Fiscal 2010 forecast	10 Med-Term Plan	Fiscal 2010 forecast		
Net sales	10,229	7,370	3,690	2,800		
Operating income	792	50	246	10		
(Operating margin)	(7.7%)	(0.7%)	(6.7%)	(0.4%)		
Income (loss) from operations	635	5	266	30		
Net income(loss)	278	-45	134	15		

2) Review of numerical targets

Based on the following assumptions, net sales will fall to "¥729 billion (consolidated) and ¥272 billion

(non-consolidated)." Even though in this difficult situation, we are planning to implement various measures in an effort to maintain adequate profit levels to enable us to deliver stable dividends, investments for growth and an improved financial position.

(Assumptions) Domestic demand: 40 million tons, other factors in line with current conditions Overseas and the group companies' business performance: in line with Fiscal 2010 forecasts

3) Review of the positioning of the 10 Medium-Term Management Plan

i) Numerical targets and approaches are kept unchanged

- Our objective: To become a leading Pacific Rim company
- Basic approach: To focus on core businesses and build a balanced earnings structure between domestic and overseas operations
- ii) To position the period through Fiscal 2011 as a stage to strengthen our foundations for growth strategies
- 3. Transition programs for growth strategies
 - Prompt and steady implementation of "structural reform without exceptions"
 - Expansion of growing businesses

Specific issues to be addressed

- i) To review and restructure the domestic production structure, including contract sales and production, in order to respond to a sharp decrease in domestic cement demand
 - : Assumption: forecasted domestic demand of cement 40 +/- α million tons.
 - : Our current export stands at an amount greater than 4 million tons. However, overseas sales are unprofitable compared to domestic sales; therefore we will gradually reduce the volume of export from Japan.
 - : While giving due consideration to already developed relationships and the key intent of existing contracts, we will propose stricter terms in negotiations with contract sales and production firms in light of the significantly falling demand.
 - : Prior to the decision regarding specific actions (selection of plants in which cement production is to be suspended), we will consider the possibility of halting the cement kiln to cope with demand changes.
 - : We will pursue every possible way to transform the application of certain cement production-related facilities, principally to waste treatment facilities.
- ii) Review of the domestic cement sales structure and streamlining of logistics
 - : To review the structure of sales and logistics systems to deal with the drastic decline in domestic demand.
 - : To embark on an urgent reduction in logistics costs in order to achieve an annual cost reduction of 2-3 billion yen.

iii) Revision of organization and personnel structure

- : To achieve a streamlined structure through eliminating and consolidating organizations.
- : To establish a competitive personnel structure that can cope with decreasing domestic demand.
- iv) Growth strategies for overseas business
 - : Rolling out environmental technologies in the overseas markets, exploration of opportunities in new countries and regions, strengthening of the downstream business development.

The details, times of implementation and effects on the Group's income of the growth strategies will be disclosed by the end of March 2010.
