Taiheiyo Cement Selected for the Dow Jones Sustainability Asia Pacific Index

Taiheiyo Cement Corporation (Head Office: Bunkyo-ku, Tokyo; President: Yoshifumi Taura) was selected as a component of the Dow Jones Sustainability Asia Pacific Index (DJSI Asia Pacific) in 2024. This index is the Asia Pacific version of the Dow Jones Sustainability Indices (DJSI) and serves as one of the key benchmarks for ESG investment.

The DJSI are stock indices developed and offered by the U.S.-based S&P Global Inc. which evaluates corporate sustainability from the three aspects of ESG. DJSI Asia Pacific, for which we were selected this time, conducted an ESG survey of about 600 major companies in the Asia Pacific region, and 161 companies (including 78 Japanese companies) were selected.

The selection for DJSI Asia Pacific this year reflects our recognition of materiality, our transparent information disclosure, our efforts towards achieving the ambitious targets set out in the “Carbon Neutral Strategy 2050”, contribution to the formation of a circular economy, and biodiversity management. In addition, we were evaluated for our local and regional engagement with stakeholders and human capital management.

Taiheiyo Cement Group will continue to contribute to social infrastructure development by providing solutions that are environmentally efficient, enhance our competitive position and bring value to our stakeholders.
