Taiheiyo Cement Selected for the First Time as a Constituent of the Nikkei Moat Stock Index

Taiheiyo Cement Corporation (Head Office: Bunkyo-ku, Tokyo; President and Representative Director: Yoshifumi Taura) has been selected for the first time as a constituent of the Nikkei Moat Stock Index.

The Nikkei Moat Stock Index is a stock index composed of 30 stocks selected from among companies listed on the Prime Market of the Tokyo Stock Exchange (excluding financials) that are considered to possess an “economic moat.” An “economic moat” refers to a situation in which a company enjoys a strong competitive advantage—supported by such factors as technological capabilities, brand strength, and cost competitiveness—that enables it to generate high earnings over the long term. The concept is also known for attracting the attention of globally renowned investors, including Warren Buffett.

We believe this selection represents the recognition that our Group’s world-class manufacturing technologies and R&D capabilities, as well as its strong business foundation centered on the Pacific Rim, are reflected in objective financial data as long-term competitive advantages.

Taiheiyo Cement Group will continue working to strengthen its medium- to long-term competitive advantages and improve profitability, while striving to enhance corporate value over the medium to long term under its aim of serving as a leading force in paving the way for a sustainable future for the Earth.
